Experience

2022 - present
Freelance
Self-employed

While working as an assistant to the construction manager I realized that I would like to pursue programming so I decided to leave the job and focus on learning programming and enrolled in a Coding BootCamp Prague, that focuses on web development.

2019 - present
Czech Technical University in Prague
Research Assistant

In this position, I am a part of a research team that focuses on automating the civil engineering industry using robots for 3D printing constructions and robotic masonry. This provided me with a lot of experience in how to approach the development of new prototypes and systems. This is a link to our latest project: http://www.robostav.cz/robostav-projekt-tacr-TH04010329

2021 - 2022
Metrostav a.s. Prague, Czechia
Assistant to Construction manager

This is my first position after graduating from university and while studying Ph.D. studies. My responsibilities included taking care of sub-constructors responsible for disposable waste systems, water supply systems, and heating systems.

2018- 2019
Subterra a.s. - Zdice, Central Bohemia, Czechia
Junior Civil Engineer

I worked in this position while finishing my master's degree in civil engineering. I worked as an assistant to a construction manager. My responsibilities were supplying the correct working teams with material, and guiding workers on how to produce the correct outcome.

Skills

- HTML, CSS
- Javascript, React.js
- PHP, Laravel
- GIT, Bootstap
